Abstracts

The contract research organization (CRO) services market is expected to reach \$85.979 billion by 2024 from \$51.850 billion in 2018 growing at a CAGR of 8.79%. A contract research organization is a company that helps conduct a clinical research for a sponsor company ranging from pre-clinical development of new products to post marketing research activities. Outsourcing research activities especially clinical research to contract research organizations helps sponsor companies to focus on other activities within their organization along with saving costs and also reducing the time period required to conduct the clinical trial. The market is expected to show a robust growth during the forecast period. The growth in the market may be attributed to the increasing outsourcing activities by the sponsor companies due to the cost saving and time reduction for the trial. Companies also opt for CRO services if they do not have complete know how of regulatory affairs in a particular country of interest, thus, positively impacting the market. However, shortage of the skilled professionals in the CROs may restrain the market for the contract research organizations during the given time frame.
