Abstracts

The control valve market is projected to grow at a CAGR of 5.64% to reach US\$11.318 billion by 2025, from US\$8.143 billion in 2019. Control valve are used to control fluid flow by varying the sizes of flow passage and is widely used in oil and gas industry. Increasing demand for automation in processed industry and rising number of nuclear plants are considered as the driving factor for the growth of the market. Increasing investment in infrastructure sector in developing economies and rapid expansion of processed industries widen up the growth opportunities for control valve market. High initial investment in valve projects is considered as the restraining factor for the growth of the market.

The Control Valve Market – Forecasts from 2020 to 2025 is an exhaustive study which aims to present the key market trends through various chapters focusing on different aspects of the market. The study provides a detailed market overview through the market dynamics sections which detail key market, drivers, restraints, and opportunities in the current market. The report analyzes key opportunity regional markets, and the current technology penetration through lifecycle analysis. The report also analyzes the market through comprehensive market segmentation by valve type, material, size, industry vertical, and geography.

The control valve market has been segmented based on valve type, material, size, industry vertical, and geography. By valve type, the market is segmented as linear valves and rotary valves. By material, the market has been classified as steel, iron and others. By size, the market is segmented as Less than 2", 2" to 8" and above 8". By industry vertical, the market has been segmented into oil and gas, water and waste water, food and beverages, energy and power and others.

Regional analysis has been provided with detailed analysis and forecast for the period 2019 to 2025. The global market has been broken down into North America, South

America, Europe, Middle East and Africa (MEA), and the Asia Pacific regions. The report also analyzes 15 countries across these regions with thorough analysis and forecast along with prevailing market trends and opportunities which each of these countries present for the manufacturers.

Major players in the control valve market have been covered along with their relative competitive position and strategies. The report also mentions recent deals and investments of different market players over the last year. The company profiles section details the business overview, financial performance for the past three years, key products and services being offered along with the recent developments of these important players in the control valve market.
