## Abstracts

Cosmetic Chemicals Market is expected to grow at a compound annual growth rate of 4.83% over the forecast period to grow to US\$27.554 billion by 2022, increasing from US\$21.765 billion in 2017. Cosmetic chemicals are integral part of different cosmetic products such as conditioners, shampoos, lotions, and creams among others. These chemicals help in increasing shelf-life of the products due to presence of various preservatives while enhancing the appearance of the user. Rising disposable income and living standards, changing consumer preferences, and advanced packaging solutions is augmenting the demand for cosmetic products. Increasing demand for personal care products is providing necessary impetus for the growth of global cosmetic chemicals market.

Growing global ageing populations is one of the major drivers of global cosmetic chemicals market. Desire to look young and beautiful is attracting consumers worldwide towards various anti-ageing and personal care products. Increasing purchasing power and living standards along with the increased demand for grooming products to look aesthetically appealing, both by women and men, is also propelling the growth of global cosmetic chemicals market. Growing global e-commerce industry will bolster the growth of global cosmetic chemicals market in the coming years since consumers around the world have an easy access to various cosmetic products from international brands. Furthermore, global market players are investing heavily on R&D to develop advanced and diverse product portfolio in order to address different consumers' requirements, thereby positively impacting the growth of cosmetic chemicals market in the next five years. However, factors such as rising demand for natural & organic cosmetic products, growing concerns over ingredient toxicity, and stringent regulations regarding cosmetic ingredients will restrain the growth of global cosmetic chemicals industry during the forecast period.

## By Product

By product, surfactants accounted for the largest market share in 2016 and will continue to dominate the product segment till the end of the forecast period owing to their diverse use in several applications such as skin care and hair care. Increasing demand for skin-repair and anti-ageing creams and lotions will exponentially augment the market share of emollients during the forecast period.

## By Geography

Geographically, North America held the maximum market share in 2016. The demand for various cosmetic chemicals in North America is majorly driven by the presence of large number of global cosmetic chemicals manufacturers in the region coupled with high consumer awareness regarding the benefits of different cosmetics and personal care products. APAC region will witness the highest CAGR during the forecast period due to increasing focus on physical appearance and personal hygiene by consumers. Growing commercialization of various international cosmetic brands in emerging economies such as China and India is also attracting customers towards different cosmaceuticals which will significantly bolster the growth of APAC Cosmetic Chemicals market in the near future.

## Competitive Insights

Prominent key market players in Cosmetic Chemicals market include Akzo Nobel, The Dow Chemical Company, BASF, Evonik, and Huntsman among others. The global cosmetic chemicals company is highly fragmented due to the presence of large number of global and regional vendors. Owing to the intense competition in the industry, market players need to follow strategic partnerships and M&A while expanding their product portfolio by launching new products as per the changing needs of customers around the globe. Recently in May 2017, Huntsman Corporation and Clariant have announced their merger to create a leading global specialty chemical company named HuntsmanClariant to improve growth profile in highly attractive end markets and geographies.
