## Abstracts

The cryotherapy market is projected to witness a CAGR of 8.87% during the forecast period. This treatment is usually recommended for home care for many injuries mainly caused by sports. The major application of cryotherapy contributes towards pain therapy for runner's knee, tendonitis, sprain, arthritis pain, pain and swelling after a hip or knee replacement and few more. Benefits of cryotherapy include lowering of skin temperature, reducing the nerve activity, thus reducing pain and swelling. Rising incidences of sports injuries, rising trend of gym activities, growing hip & knee replacement surgeries worldwide and rising trend of self-care is driving the growth of the global cryotherapy market in the forecast period emanating the market demand for the cryotherapy products.
