Abstracts

The global deep fat fryer market is projected to grow at a CAGR of 4.80% to reach US\$1,537.394 million by 2024, from US\$1,160.443 million in 2018. The demand for deep fat fryers is increasing on account of improvement in the standards of living and the rising consumption of fast foods all around the world. However, the rise in demand for healthier alternatives in the form of air fryers and the shifting trend towards a healthier lifestyle will restrain the growing demand for deep fat fryer worldwide. The North American region will have a significant market share on account of high consumption of fast food, and the presence of some of the key players will provide for the easier availability of the products in the region. The Asia Pacific region is projected to grow at an impressive rate owing to rapid urbanization, improvement in the standard of living and the trend towards the consumption of fast food.
