Abstracts

The dental 3D printing market is projected to grow at a CAGR of 26.14% to reach US\$4,469.272 million by 2024, from US\$1,109.456 million in 2018. The market growth for dental 3D printing can be attributed to the increasing adoption of dental 3D printers in dental hospitals and clinics. Also increasing disposable income in developing countries also leads to increased dental expenditure resulting in widening up the market for dental 3D printing. Moreover, rising demand for cosmetic dentistry along with the growing geriatric population also fuels the market growth for dental 3D printing. However the high cost of dental treatment is the leading factor expected to hamper the growth of the global market.
