## Abstracts

The Dental Cement market is projected to grow at a CAGR of 5.62% to reach US\$1,161.508 million by 2023, from US\$836.843 million in 2017. Dental issues like cavities and tooth decay are considered as one of the most common health problems among children and teenagers. Rising geriatric population and increasing dental issues are considered as the driving factor for the growth of the market. According to World health organization report, dental caries is one of the major oral health problems affecting nearly 60-90% of the school children and vast majority of adults. Moreover rising health awareness and increasing adoption of cosmetic dental procedures are also considered as the key factors for the growth of the market. However high cost of dental materials is considered as the restraining factor for the growth of the market.

This research study examines the current market trends related to the demand, supply, and sales, in addition to the recent developments. Major drivers, restraints, and opportunities have been covered to provide an exhaustive picture of the market. The analysis presents in-depth information regarding the development, trends, and industry policies and regulations implemented in each of the geographical regions. Further, the overall regulatory framework of the market has been exhaustively covered to offer stakeholders a better understanding of the key factors affecting the overall market environment.
