Abstracts

The E-hailing market is projected to grow at a CAGR of 20.38% during the forecast period, reaching a total market size of US\$522.526 billion in 2024 from US\$171.721 billion in 2018. The process of requesting a passenger vehicle through any electronic device such as desktop, mobiles, etc. is termed as e-hailing or ride-hailing. Rising proliferation of smartphones and internet connectivity is driving the demand for e-hailing services across the globe. Growing traffic congestion and rising fuel costs is further boosting the demand for e-hailing services, thus positively impacting the growth of the e-hailing market. Increasing efforts by the government to regulate the ride-hailing industry in different countries will continue to propel the growth of the e-hailing market in the coming years. Geographically, APAC is projected to witness significant market growth during the forecast period owing to the rapid expansion of the internet infrastructure coupled with the increasing use of smart devices in countries like India and China.
