Abstracts

The ethernet cable market is evaluated at US\$5.562 billion for the year 2018 and is projected to grow at a CAGR of 5.83% to reach US\$7.817 billion by the year 2024. Ethernet Cables are phone cables like wires which transmit data at high speeds to and from a router, a switch or a computer device. The demand for Ethernet cables will grow owing to the faster speeds and less latency that they offer as compared to wireless networks. Moreover, Ethernet cables are more secure as they cannot be intercepted and are comparatively easy to connect and setup. However, the availability of substitutes in the form of wireless networks and fiber optic cables, and its limited connection and range due to its physical structure will limit the growth of the demand for these cables over the forecasted period. The North American market will hold a significant share of the market due to the early adoption of the internet and technology, and the Asia Pacific market will see ample growth opportunities due to rising commercialization and improvement in the internet and technology infrastructure in the next five years.

The “Ethernet Cable Market – Forecasts from 2019 to 2024” is an exhaustive study that aims to present the key market trends through various chapters focusing on different aspects of the market. The study provides a detailed market overview through the market dynamics sections which detail key market, drivers, restraints, and opportunities in the current market. The report analyzes key opportunity regional markets, and the current technology penetration through lifecycle analysis. The report also analyzes the market through comprehensive market segmentation by type, shielding, end-user, and geography.

The ethernet cable market has been segmented based on type, shielding, end-user, and geography. By type, the market has been segmented into coaxial, twisted pair, and fiber-optic. By shielding the market is segmented into shielded and unshielded. By the end-user, the market is segmented into residential, commercial, and industrial.

Regional analysis has been provided with detailed analysis and forecast for the period 2018 to 2024. The global market has been broken down into North America, South America, Europe, Middle East and Africa, and the Asia Pacific regions. The report also analyzes 15 countries across these regions with thorough analysis and forecast along with prevailing market trends and opportunities which each of these countries present for the manufacturers.

Major players in the ethernet cable market have been covered along with their relative competitive position and strategies. The report also mentions recent deals and investments of different market players over the last year. The company profiles section details the business overview, financial performance for the past three years, key products and services being offered along with the recent developments of these important players in the ethernet cable market.
