Abstracts

Europe Control Valve Market is estimated to grow from US\$1.803 billion in 2015 to US\$2.521 billion by 2021, at a CAGR of 5.75% over the forecast period. New and stricter regulations for ballast water treatment are boosting the demand for control valves. Expanding production of oil and gas from subsea sources is augmenting the requirement of efficient and expensive industrial control valves. High labor costs in European countries are forcing manufacturers to shift towards automation system in process industries. This is further propelling the growth of control valve market in Europe. Development of nuclear power infrastructure in France will bolster the growth of European Control Valve market during the forecast period.

Research Methodology

The first section of the report deals with detailed research methodology for calculating market size and forecasts, secondary data sources used and the primary inputs which were taken for data validation. This section also outlines various segmentations which have been covered as part of the report.
