Abstracts

The extruded plastic market for construction industry is projected to grow at a CAGR of 4.42% to reach US\$50.447 billion by 2024. Plastic extrusion is a high-volume manufacturing process in which raw plastic is melted and formed into a continuous profile such as pipe/tubing, deck railing, window frames, plastic sheets and films and etc. Extrusions of PVC, ABS (acrylonitrile butadiene styrene), polypropylene and etc. are generally used in pipe fittings and many more construction applications. Growing skyscraper construction across the globe is driving the demand for extruded plastics. Furthermore, government policies and initiatives are providing a big boost to the residential construction which is positively influencing the extruded plastic market growth. Thus, the market is set to grow at a decent rate on account of burgeoning construction activities around the globe.

This research study examines the current market trends related to the demand, supply, and sales, in addition to the recent developments. Major drivers, restraints, and opportunities have been covered to provide an exhaustive picture of the market. The analysis presents in-depth information regarding the development, trends, and industry policies and regulations being implemented by the relevant agencies. Further, the overall regulatory framework of the market has been exhaustively covered to offer stakeholders a better understanding of the key factors affecting the overall market environment.

Identification of key industry players in the industry and their revenue contribution to the overall business or relevant segment aligned to the study has been covered as a part of competitive intelligence done through extensive secondary research. Various studies and data published by industry associations, analyst reports, investor presentations, press releases and journals among others have been taken into consideration while

conducting the secondary research. Both bottom-up and top down approaches have been utilized to determine the market size of the overall market and key segments. The values obtained are correlated with the primary inputs of the key stakeholders in the extruded plastic for construction value chain. The last step involves complete market engineering which includes analyzing the data from different sources and existing proprietary datasets while using various data triangulation methods for market breakdown and forecasting.

Market intelligence is presented in the form of analysis, charts, and graphics to help the clients in gaining faster and efficient understanding of the extruded plastic market for construction industry.

Major industry players profiled as part of the report are BASF SE, Eaton, DS Smith, SFR Industries, Condale Plastics Ltd., Blackwell Plastics, Chevron Philips Chemical Company, Crescent Plastics Incorporated, HEXAPROFILS, and Palram Industries Ltd.

Segmentation

The extruded plastic market for construction industry has been analyzed through following segments:

By Type

Polypropylene (PP)

Polyethylene (PE)

LDPE

HDPE

Polyvinyl Chloride (PVC)

Others

By Geography

North America

USA

Canada

Mexico

Others

South America

Brazil

Argentina

Others

Europe

Germany

France

United Kingdom

Others

Middle East and Africa

Israel

Saudi Arabia

Others

Asia Pacific

China

Japan
