Abstracts

The extruded plastic market for packaging industry is projected to grow at a CAGR of 4.73% during the forecast period. Packaging is the major end-user of the extruded plastics and holds a major share in the market. Extruded plastic products such as plastic films are widely used in packaging industry owing to increasing pressure to satisfy varied demands such as low cost, improved performance, and enhanced environment attributes. Growing penetration of plastic films in applications such as pharmaceutical, chemical, and electronics packaging is driving the extruded plastics market growth. Furthermore, burgeoning trend towards flexible packaging is supporting the extruded plastics market growth as it is increasing the demand for high performance films.

This research study examines the current market trends related to the demand, supply, and sales, in addition to the recent developments. Major drivers, restraints, and opportunities have been covered to provide an exhaustive picture of the market. The analysis presents in-depth information regarding the development, trends, and industry policies and regulations being implemented by the relevant agencies. Further, the overall regulatory framework of the market has been exhaustively covered to offer stakeholders a better understanding of the key factors affecting the overall market environment.

Identification of key industry players in the industry and their revenue contribution to the overall business or relevant segment aligned to the study has been covered as a part of competitive intelligence done through extensive secondary research. Various studies and data published by industry associations, analyst reports, investor presentations, press releases and journals among others have been taken into consideration while conducting the secondary research. Both bottom-up and top down approaches have

been utilized to determine the market size of the overall market and key segments. The values obtained are correlated with the primary inputs of the key stakeholders in the extruded plastic for packaging value chain. The last step involves complete market engineering which includes analyzing the data from different sources and existing proprietary datasets while using various data triangulation methods for market breakdown and forecasting.

Market intelligence is presented in the form of analysis, charts, and graphics to help the clients in gaining faster and efficient understanding of the extruded plastic market for packaging industry.

Major industry players profiled as part of the report are Eaton, DS Smith, Condale Plastics Ltd., Blackwell Plastics, Sigma Plastics Group, ASYTEC, DuPont Tejin Films, COEXPAN, YVROUD, and Arabian Plastic Industrial Company Limited.

Segmentation

The extruded plastic market for packaging industry has been analyzed through following segments:

By Type

Polypropylene (PP)

Polyethylene (PE)

LDPE

HDPE

Polyvinyl Chloride (PVC)

Others

By Geography

North America

USA

Canada

Mexico

Others

South America

Brazil

Argentina

Others

Europe

Germany

France

United Kingdom

Others

Middle East and Africa

Israel

Saudi Arabia

Others
