Abstracts

The fiberscope market is projected to grow at a compound annual growth rate of 4.15% over the forecast period 2017 to 2023. A fiberscope is a fiber-optic device used for viewing inaccessible internal structures, either in an industrial scenario or the human body. Rising health concerns coupled with increasing healthcare expenditure is driving the demand for fiberscopes for diagnostic and therapeutic purposes globally. In addition, the trend towards building and home automation will further contribute to the growing demand for these devices for monitoring and inspection purposes. Rising demand across different industry verticals and research and development activities being carried out in different regions will boost the demand for fiberscopes over the forecast period.

This research study examines the current market trends related to the demand, supply, and sales, in addition to the recent developments. Major drivers, restraints, and opportunities have been covered to provide an exhaustive picture of the market. The analysis presents in-depth information regarding the development, trends, and industry policies and regulations implemented in each of the geographical regions. Further, the overall regulatory framework of the market has been exhaustively covered to offer stakeholders a better understanding of the key factors affecting the overall market environment.

Identification of key industry players in the industry and their revenue contribution to the overall business or relevant segment aligned to the study have been covered as a part of competitive intelligence done through extensive secondary research. Various studies and data published by industry associations, analyst reports, investor presentations, press releases and journals among others have been taken into consideration while conducting the secondary research. Both bottom-up and top down approaches have been utilized to determine the market size of the overall market and key segments. The values obtained are correlated with the primary inputs of the key stakeholders in the

fiberscope value chain. The last step involves complete market engineering which includes analyzing the data from different sources and existing proprietary datasets while using various data triangulation methods for market breakdown and forecasting.

Market intelligence is presented in the form of analysis, charts, and graphics to help the clients in gaining faster and efficient understanding of the fiberscope market.

Major industry players profiled as part of the report are Olympus Corporation, General Electric Company, Zibra Corporation, Medit, Inc., PCE Instruments, and KARL STOREZ NDTec GmbH among others.
