Adaptogens Market is expected to grow at CAGR of 8.55% to reach 3,993.345 million in 2025 from US\$2,441.406 million in 2019. Adaptogens are known as a non-toxic plant that is used as a resistor to stress in a body. It works to relieve different types of stress such as biological, chemical, or physical. The roots and herbs are being used since ancient times, especially in countries such as China and India. It is used as a healing source in Ayurvedic and Chinese traditions. There are some types of adaptogens such as holy basil that are consumable and used as a specific part of a meal. Some are used in beverages such as teas and are consumed as a supplement. Stress is one of the imperative problems in today's life. With the surge in the adaptation of modern lifestyles, the rate of stress in an individual is also surging. Adaptogens are also used by athletes to relieve mental pressure which helps in the overall form and performance of the athlete. Companies are investing a substantial sum of capital into this product.

The surge in the Innovation, Transparency, and Brand-Building of the product

Companies are investing a significant sum of capital into the R&D and innovation of the adaptogens product. There is a specific need to build trust, transparency among the consumers. Investments and brand building will help the manufacturers to gain a competitive edge in the market. There is a surge in the consumer preferences and awareness for the product that the individual is consuming. Innovation is the key to enhance and introduce novel products in the market. The ayurvedic sector will have an imperative role as the usage of adaptogens was well discovered in Ancient times. There has been a surge in the usage of adaptogens in the food and beverage industry as more consumers are using the product in their meals or as a supplement in the drink. There is a need for creative marketing strategies to build trust and awareness among consumers. The companies are regularly enhancing and building more production

facilities to accommodate the demand by the consumers. There are a considerable number of consumers that are drifting away from pharmaceutical and medical products as those products are not giving the desired results to the consumers. Adaptogens are used to cure renal, cardiovascular, and digestive problems. There has been a surge in the awareness to consume novel and safer medicinal herbs that are used to maintain endocrine homeostasis. There are considerable advantages of using medicinal herbs that are related to a better and healthier body.

Adaptogens are used as a substitute for CBD

Cannabidiol which is also known as CBD is used for relieving stress, pain enhances digestion, and surges the mental focus of a brain. There has been a substantial use for CBD based products in the tinctures, beverages, and yoga apparels, which will register significant growth in the CBD industry, but there are considerable advantages of adaptogens based products that are expected to become a substitute for CBD based products. Adaptogens are known for their stress-relieving applications, and other medical properties that are expected to drive the adaptogens demand in the coming years.
