Abstracts

The global dental infection control products market is projected to expand at a CAGR of 5.12% over the forecast period of 2017 - 2023. Measures taken to control the spread of infections in dental health care settings is the foremost demand and is also driving the growth of the dental infection control products market at a global level. The infection control products range from the use of disposable single-use dental tools and needles, gloves, masks to equipment such as ultrasonic cleaning units and instrument cleaning solutions like detergents and decontaminants. The growing elderly population, incidences of dental and other periodontal conditions are the drivers driving the growth of the global dental infection control products market.

Region-wise, the Asia Pacific is expected to show a high growth in the forecast period due to a large population base, rising number of oral diseases due to the adoption of unhealthy living conditions, growing dental tourism offering affordable dental care, dental treatment and surgery and rising disposable income in this region.

Dentisan, a UK-based company headquarter in Arboretum Ward, City of Derby has an award-winning portfolio to meet the challenges of infection prevention in dental practices. Designed by the team of chemical engineers, they continue to carry out research targeted towards the improvement of formulations in order to prevent the spread of infections during dental surgery. The products are made available throughout the United Kingdom via the country's leading dental suppliers. The products deal in multi surface cleaning, instrument decontamination, dental unit water lines, hand care, testing & validation, suction systems, manual & ultrasonic cleaning, and washer disinfectant cleaning.

Major industry players profiled as part of the report are Dentisan, Biotrol, 3M, KaVo Kerr and COLTENE Group among others.
