Abstracts

The global eDiscovery market was valued at US\$8.399 billion in 2017 and is expected to grow at a CAGR of 11.35% over the forecast period to reach a market size of US\$16.007 billion by 2023. The growth of this market is being shaped by increasing penetration of Internet of Things (IoT) into all major industry verticals. Continuous digitization of business processes has been exponentially increasing the volume of data stored both by enterprises and government agencies. Increasing focus of governments and legal firms towards streamlining their operations and reducing operational costs is increasing the adoption of advanced technologies by them, which is driving the adoption of eDiscovery solutions and services by them, thus boosting the growth of this market.

This research study examines the current market trends related to the demand, supply, and sales, in addition to the recent developments. Major drivers, restraints, and opportunities have been covered to provide an exhaustive picture of the market. The analysis presents in-depth information regarding the development, trends, and industry policies and regulations implemented in each of the geographical regions. Further, the overall regulatory framework of the market has been exhaustively covered to offer stakeholders a better understanding of the key factors affecting the overall market environment.

Identification of key industry players in the industry and their revenue contribution to the overall business or relevant segment aligned to the study has been covered as a part of competitive intelligence done through extensive secondary research. Various studies and data published by industry associations, analyst reports, investor presentations, press releases and journals among others have been taken into consideration while conducting the secondary research. Both bottom-up and top down approaches have been utilized to determine the market size of the overall market and key segments. The

values obtained are correlated with the primary inputs of the key stakeholders in the global eDiscovery value chain. Last step involves complete market engineering which includes analysing the data from different sources and existing proprietary datasets while using various data triangulation methods for market breakdown and forecasting.
