## Abstracts

Global food and beverage warehousing market is projected to witness the growth at a CAGR of 10.19% during the forecast period to reach a total market size of US\$191.039 billion by 2022, increasing from US\$117.607 billion in 2017. The speed and accuracy in food and beverage sector is extremely important due to the perishability nature of the products. This drives the need for refrigeration in order to keep products fresh and prevent contamination while augmenting the need for food and beverage warehousing facilities. In addition, warehouse solution is further expected to be driven by increasing need for automation for effective management, better productivity and cost effectiveness. Increased demand for visibility and real-time control by producers and other advantages of food and beverage warehouses is also addressed by the warehousing solutions. Innovation within the industry is also contributing to the market growth, as increasing number of producers are relying on the warehouses for effective management of the supply chain. However, strict environment legislative norms and high power consumption of cold storage facilities is hampering the market growth.

### By Application

By application, fruits and vegetables held the largest global market share in 2016 owing requirement of preventing the decay of fruits and vegetables. However, the meat, fish, and sea food segment of global food and beverage warehousing market is projected to grow at the fastest rate by 2022, due to high demand for meat products. Rising demand for protein-rich diet for good health and fitness-conscious people requires manufacturers to set up efficient warehouses for these products globally, as these are easily perishable when exposed to changes in temperature.

### By Geography

Geographically, global food and beverage warehousing market is segmented as Americas, Europe Middle East and Africa, and Asia Pacific. Americas accounted for significant market share of the global food and beverage warehousing market in 2016 owing to high demand for natural food and beverage products. An increasing demand for vegetable and fruits further contributes to the market growth. The availability of space and developed transportation infrastructure attract the new entrants within the region while propelling the food & beverage warehousing market growth.
