Abstracts

The global medical bed market is projected to grow at a CAGR of 3.06% to reach US\$1.841 billion by 2023, from US\$1.537 billion in 2017. The demand for medical or hospital beds is growing due to the rising chronic disease prevalence and growing number of surgical procedures. Good infection control, enhanced ergonomics, comfort, safety, and ease of use promoting effective risk management are the benefits of medical beds creating demand for their use globally. Additionally, rising home care settings accompanied by remote patient monitoring will further boost the market demand in the forecast period. However, the decrease in the length of hospital stays would hamper the growth of the global medical bed market in hospitals.

This research study examines the current market trends related to the demand, supply, and sales, in addition to the recent developments. Major drivers, restraints, and opportunities have been covered to provide an exhaustive picture of the market. The analysis presents in-depth information regarding the development, trends, and industry policies and regulations implemented in each of the geographical regions. Further, the overall regulatory framework of the market has been exhaustively covered to offer stakeholders a better understanding of the key factors affecting the overall market environment.
