Abstracts

Global Operational Technology market is projected to grow from US\$28.787 billion in 2018 to US\$37.646 billion in 2023, growing at a CAGR of 5.51% over the forecast period. This research study examines the Operational Technology market on the basis of various segments - by component, networking technology, end user, and geography. Major drivers, restraints, and opportunities have been mentioned to provide an exhaustive picture of the market. Furthermore, the current market trends related to the demand, supply, and sales, in addition to the recent developments, have been provided in this report. The report also analyzes key players in the Operational Technology market. The report provides comprehensive forecast up to the period 2023 for various key segments, with 2017 as base year.

Research Methodology

The report provides brief introduction of the market and deals with detailed research methodology for calculating market size and forecasts, secondary data sources used and the primary inputs which were taken for data validation. This section also outlines various segmentations which have been covered as part of the report.

Market Dynamics

This section provides comprehensive market dynamics through an overview section along with growth drivers, challenges and opportunities which exist in the current market. This section of the report also provides supplier and industry outlook as a whole; key industry, global and regional regulations which are determining the market growth and a brief technological aspect of Operational Technology. Complete industry analysis has also been covered through Porter's five forces model as a part of this

report section.
