## Abstracts

The global prefilled syringes market is expected to expand at a CAGR of 10.29% over the forecast period of 2017-2023. Prefilled syringes refers to the disposable syringe that is already loaded with the unit dose of the substance to be injected to which a needle has been already been fixed by the manufacturer. The syringes are designed in such a way that it administers the accurate amount of dosage, thus, reducing the wastage of the medication. Rising preference of the prefilled syringes over the conventional syringe-vial combination because of the advantages offered by prefilled syringes such as increased patient safety and convenience, accuracy etc. is the key factor driving the growth of the industry. Reduced medication errors, and better use of controlled drugs such as narcotics using prefilled syringes will further boost the market during the forecast period. However, availability of the cheaper alternatives to the Prefilled Syringes and focus towards development of alternative drug delivery methods might restrain the market during the given time frame.

This research study examines the current market trends related to the demand, supply, and sales, in addition to the recent developments. Major drivers, restraints, and opportunities have been covered to provide an exhaustive picture of the market. The analysis presents in-depth information regarding the development, trends, and industry policies and regulations implemented in each of the geographical region. Further, the overall regulatory framework of the market has been exhaustively covered to offer stakeholders a better understanding of the key factors affecting the overall market environment.

Identification of key industry players in the industry and their revenue contribution to the overall business or relevant segment aligned to the study have been covered as a part of competitive intelligence done through extensive secondary research. Various studies

and data published by industry associations, analyst reports, investor presentations, press releases and journals among others have been taken into consideration while conducting the secondary research. Both bottom-up and top down approaches have been utilized to determine the market size of the overall market and key segments. The values obtained are correlated with the primary inputs of the key stakeholders in the global prefilled syringe market value chain. Last step involves complete market engineering which includes analysing the data from different sources and existing proprietary datasets while using various data triangulation methods for market breakdown and forecasting.

Market intelligence is presented in the form of analysis, charts, and graphics to help the clients in gaining faster and efficient understanding of the global prefilled syringes market.

Major industry players profiled as part of the report are CHEMI S.p.A., Catalent, Inc, Becton, Dickinson and Company, Nipro Corporation, and Taisei Kako co., Ltd. among others.
