Abstracts

Global self-service ticket machines market was valued at US\$7.218 billion in 2017 and is projected to expand at a CAGR of 6.27% over the forecast period to reach US\$10.397 billion by 2023. A self-service ticket machine operates as a ticket producing and dispensing machine, which helps a user to get the required tickets without waiting in a queue at the ticket counter. The self-service ticket machines can also be used to validate tickets which are used in situations when they have been purchased in advance to be used later, as these tickets are time-stamped to decide their legitimacy in such scenarios.
