Abstracts

The global Semiconductor Lamps market is projected to grow at a CAGR of 7.46% to reach US\$21.186 billion by 2024. The rising demand for smartphones and other communication devices will be one of the leading reasons for the rise in the demand for semiconductor lamps during the forecast period, as they are being increasingly used as a notification indicator, and more. Furthermore, the growing demand for consumer electronics, especially in budding economies, will further propel the demand for these devices in the coming years. The Asia Pacific region will hold a major share in the market owing to the growing semiconductor manufacturing activities in the region due to cheaper availability of labor and favorable government policies.

This research study examines the current market trends related to the demand, supply, and sales, in addition to the recent developments. Major drivers, restraints, and opportunities have been covered to provide an exhaustive picture of the market. The analysis presents in-depth information regarding the development, trends, and industry policies and regulations being implemented by the relevant agencies. Further, the overall regulatory framework of the market has been exhaustively covered to offer stakeholders a better understanding of the key factors affecting the overall market environment.

Identification of key industry players in the industry and their revenue contribution to the overall business or relevant segment aligned to the study have been covered as a part of competitive intelligence done through extensive secondary research. Various studies and data published by industry associations, analyst reports, investor presentations, press releases and journals among others have been taken into consideration while conducting the secondary research. Both bottom-up and top-down approaches have been utilized to determine the market size of the overall market and key segments. The

values obtained are correlated with the primary inputs of the key stakeholders in the global Semiconductor Lamps value chain. The last step involves complete market engineering which includes analyzing the data from different sources and existing proprietary datasets while using various data triangulation methods for market breakdown and forecasting.

Market intelligence is presented in the form of analysis, charts, and graphics to help the clients in gaining faster and efficient understanding of the Semiconductor Lamps market.

Major industry players profiled as part of the report are Vishay Intertechnology, Inc., ROHM Semiconductor, Toshiba Corporation, Lumileds Holding B.V., among others.

Segmentation

The Semiconductor Lamps market have been analyzed through following segments:

By End-User Industries

Communication

Consumer Electronics

Automotive

Manufacturing

By Geography

Americas

USA

Canada

Brazil

Others

Europe Middle East and Africa

Germany

France

United Kingdom

Italy
