Abstracts

Global system integration market is estimated to reach US\$480.62 billion by 2022 at a CAGR of 8.04% over the forecast period from the current estimate of US\$302.21 billion in 2017. System Integration combines the operations of various activities including building automation systems, computerized maintenance management systems, security software, and building performance visualization software among others. The increasing demand for building automation in both, the developed and developing regions in the world will drive the demand for system integration solutions. In addition, cost-effectiveness and improved efficiency will further boost the demand for these solutions over the forecast period.

This research study examines the current market trends related to the demand, supply, and sales, in addition to the recent developments. Major drivers, restraints, and opportunities have been covered to provide an exhaustive picture of the market. The analysis presents in-depth information regarding the development, trends, and industry policies and regulations implemented in each of the geographical regions. Further, the overall regulatory framework of the market has been exhaustively covered to offer stakeholders a better understanding of the key factors affecting the overall market environment.

Identification of key industry players in the industry and their revenue contribution to the overall business or relevant segment aligned to the study have been covered as a part of competitive intelligence done through extensive secondary research. Various studies and data published by industry associations, analyst reports, investor presentations, press releases and journals among others have been taken into consideration while conducting the secondary research. Both bottom-up and top-down approaches have been utilized to determine the market size of the overall market and key segments. The

values obtained are correlated with the primary inputs of the key stakeholders in the pressure sensors value chain. The last step involves complete market engineering which includes analyzing the data from different sources and existing proprietary datasets while using various data triangulation methods for market breakdown and forecasting.

Market intelligence is presented in the form of analysis, charts, and graphics to help the clients in gaining faster and efficient understanding of the market.

Major industry players profiled as part of the report are Tyco Integrated Security, Converjint Technologies LLC, Lockheed Martin Corporation, and Northrop Grumman Corporation among others.
