## Abstracts

The healthcare exoskeleton market is projected to grow at a CAGR of 36.03% to reach US\$4,495.972 million by 2024, from US\$709.742 million in 2018. The global market for exoskeleton is largely driven by recent advances in technology coupled with rising adoption of exoskeletons in the military and industrial sector. The growing demand for exoskeleton in rehabilitation, as well as increasing number of people suffering from spinal cord injuries, will boost the demand for exoskeletons. The continuous product innovation will augment the demand for exoskeletons in the coming years. In addition to this, the rising adoption of exoskeletons in developing countries will further add to their demand over the projected period.
