Abstracts

The IIoT platform market is expected to reach \$1,081.854 million by 2024 from \$314.715 million in 2018 growing at a CAGR of 22.85%. The growth of this market is being driven by increasing support from the governments towards strengthening of their industrial infrastructure. China, for instance, is leading the list of most connected countries in the world as the Chinese government has been seeing the development of industrial IoT as a matter of national priority. The government, in 2010, announced the establishment of a National IoT Centre in Shanghai, and last year, the government announced that it would increase the financial support for major industrial projects under its Made in China 2025 strategy. This trend is being seen in other regions as well. As this continues, the demand for IIoT platforms will continue to increase, thus boosting the growth of the market.
