Abstracts

Industrial Radiography market is expected to grow moderately over the period 2017 to 2022. Industrial radiography is the use of electromagnetic waves to inspect any flaw or damage in a product internally. Increased inspection quality by integration with advanced software and growing demand from automotive and aerospace industry are some key factors contributing to the growth of this market. Industrial radiology provides automotive manufacturers for engineering high-quality products and inspecting it during the manufacturing process. Development of new power plants in the developing economies is also contributing to the growth of this market. Americas region currently accounts for the bulk of the market, while Asia Pacific region is expected to grow at the highest CAGR during the forecast period due to the presence of a large number of companies and government initiatives to boost the manufacturing sector.

Research Methodology

The first section of the report deals with detailed research methodology for calculating market size and forecasts, secondary data sources used and the primary inputs which were taken for data validation. This section also outlines various segmentation which has been covered as part of the report.

Market Dynamics

Next section provides comprehensive market dynamics through an overview section along with growth drivers, challenges, and opportunities which exist in the current market. This section of the report also provides supplier and industry outlook as a whole; key industry, global and regional regulations which are determining the market growth and a brief technological aspect of Industrial radiography. Complete industry

analysis has also been covered by Porter's five forces model as a part of this report section.

Segmentation

Thirdly, Industrial radiography market has been segmented on the basis Imaging techniques and application industries. Under imaging techniques; Film based and Digital have been covered. Whereas, under application market is segmented into power generation, manufacturing, aerospace, automotive among others. Detailed comprehensive forecast with analysis has also been covered as part of this section.

Important regions for vendors in terms of market size is covered through detailed geographical segmentation. Geographical regions covered as a part of this section are Americas, Europe Middle East and Africa and Asia Pacific.

Market Players

Finally, competitive intelligence section deals with major players in the market, their market shares, growth strategies, products, financials, and recent investments among others. Key industry players profiled as part of this section are 3DX-RAY Ltd., Anritsu Corporation, Perkin Elmer, Bosello High Technologies SRL, FUJIFILM Holding Corporation, Shimadzu Corporation along with others.
