Abstracts

The Israel extruded plastic Market is projected to grow at a CAGR of 2.62% during the period 2018-2024. Rapid urbanization is leading to an increased number of dwelling constructions in the country. According to Central Bureau of Statistics of Israel, at the end of December 2018, approximately 117,600 dwellings were under active construction. Growing construction activities are directly augmenting the sales of plastic extrusions such as pipes, windows, profiles, and etc. Therefore, manufacturers like Palram Israel Ltd. are continually providing flexible extrusion solutions so as to meet the growing demand for PVC, and other thermoplastics extrusions. However, the consumption of extruded plastic is expected to be affected by the plastic ban in the country which can restrain the market growth in the forecast period. Thus, the extruded plastic market in Israel is expected to grow at a steady rate over the forecast period.

This research study examines the current market trends related to the demand, supply, and sales, in addition to the recent developments. Major drivers, restraints, and opportunities have been covered to provide an exhaustive picture of the market. The analysis presents in-depth information regarding the development, trends, and industry policies and regulations implemented in each of the geographical regions. Further, the overall regulatory framework of the market has been exhaustively covered to offer stakeholders a better understanding of the key factors affecting the overall market environment.

Identification of key industry players in the industry and their revenue contribution to the overall business or relevant segment aligned to the study has been covered as a part of competitive intelligence done through extensive secondary research. Various studies and data published by industry associations, analyst reports, investor presentations, press releases and journals among others have been taken into consideration while

conducting the secondary research. Both bottom-up and top down approaches have been utilized to determine the market size of the overall market and key segments. The values obtained are correlated with the primary inputs of the key stakeholders in the Israel extruded plastic value chain. The last step involves complete market engineering which includes analyzing the data from different sources and existing proprietary datasets while using various data triangulation methods for market breakdown and forecasting.

Market intelligence is presented in the form of analysis, charts, and graphics to help the clients in gaining faster and efficient understanding of the Israel extruded plastic market.

Some of the key players include PLASTOPIL, Palram Industries Ltd., HULIOT, Uniflex, and LAGEENTUBES.

Segmentation

The Israel extruded plastic market has been analyzed through following segments:

By Type

Polypropylene (PP)

Polyethylene (PE)

LDPE

HDPE

Polyvinyl Chloride (PVC)

Others

By End-User Industry

Construction

Electrical and Electronics

Packaging

Automotive

Others
