Abstracts

The Japan extruded plastic Market is projected to grow at a CAGR of 2.57% over the forecast period 2018-2024. The consumption of extruded plastic is driven by the industries such as construction, packaging, and automotive. Rising investment in infrastructure development is providing a big boost to the extruded plastic market growth as plastic extrusions such as pipes are widely used in a wide range of piping applications that helps to meet modern infrastructure needs. Thus, the market is expected to grow at a steady pace over the forecast period owing to burgeoning construction and growing incorporation of extruded plastic in automotive design.

This research study examines the current market trends related to the demand, supply, and sales, in addition to the recent developments. Major drivers, restraints, and opportunities have been covered to provide an exhaustive picture of the market. The analysis presents in-depth information regarding the development, trends, and industry policies and regulations implemented in each of the geographical regions. Further, the overall regulatory framework of the market has been exhaustively covered to offer stakeholders a better understanding of the key factors affecting the overall market environment.

Identification of key industry players in the industry and their revenue contribution to the overall business or relevant segment aligned to the study has been covered as a part of competitive intelligence done through extensive secondary research. Various studies and data published by industry associations, analyst reports, investor presentations, press releases and journals among others have been taken into consideration while conducting the secondary research. Both bottom-up and top down approaches have been utilized to determine the market size of the overall market and key segments. The values obtained are correlated with the primary inputs of the key stakeholders in the

Japan extruded plastic value chain. The last step involves complete market engineering which includes analyzing the data from different sources and existing proprietary datasets while using various data triangulation methods for market breakdown and forecasting.

Market intelligence is presented in the form of analysis, charts, and graphics to help the clients in gaining faster and efficient understanding of the Japan extruded plastic market.

Some of the key players include DuPont Tejin Films, Asahi Kasei Corporation, Eaton, KISCO LIMITED, and Fukuvi Chemical Industry Co., Ltd.

Segmentation

The Japan extruded plastic market has been analyzed through following segments:

By Type

Polypropylene (PP)

Polyethylene (PE)

LDPE

HDPE

Polyvinyl Chloride (PVC)

Others

By End-User Industry

Construction

Electrical and Electronics

Packaging

Automotive

Others
