## Abstracts

Medical IoT Security Market is set to grow at a 17.65% CAGR, growing from USD 496.580 million in 2025 to USD 1317.132 million in 2031.

The medical IoT security market is experiencing substantial revenue growth, driven by the imperative need to protect medical IoT devices from data breaches and cyberattacks. As healthcare organizations increasingly leverage connected devices to enable remote patient monitoring and real-time health data analysis, the security landscape has become more complex and critical. These IoT devices offer significant opportunities for healthcare professionals to monitor patients' vital signs remotely, enhancing early disease detection and enabling personalized care delivery. However, the proliferation of connected medical devices simultaneously introduces significant challenges related to data security and privacy protection.

### Growing Cybersecurity Threat Landscape

The escalating frequency and sophistication of cyberattacks represents a primary driver for medical IoT security market expansion. Distributed Denial of Service attacks pose particularly severe threats to healthcare organizations by disrupting access to vital resources and compromising the ability to provide patient care. According to analysis published by the US Healthcare Cybersecurity Coordination Center in February 2023, ransomware DDoS attacks increase by 67 percent annually and 24 percent quarterly, demonstrating the accelerating threat environment. As of Q2 2022, UDP attacks constituted the majority at 62.53 percent of all DDoS attacks, followed by SYN and TCP attacks, highlighting the diverse nature of threats targeting healthcare infrastructure.

The vulnerability of medical IoT devices has resulted in significant consequences for

healthcare organizations, with millions of patient records exposed in recent years, leading to substantial privacy concerns and financial losses. This reality underscores the critical importance of implementing robust security measures to protect sensitive health information and maintain operational continuity.

### Smart Healthcare Adoption and Security Requirements

The rising trend toward smart healthcare services represents both an opportunity and a challenge for the medical IoT security market. Smart healthcare leverages advanced information technologies including IoT, big data analytics, cloud computing, artificial intelligence, and deep machine learning to transform traditional healthcare delivery models. These technologies enable healthcare to become more efficient, convenient, and personalized, fundamentally changing how medical services are provided and consumed.

However, increased adoption of these advanced technologies raises significant privacy concerns, creating critical demand for robust security measures throughout the medical sector. Private sector players are responding with substantial investments to expand medical IoT security solutions. In May 2021, Cynerio raised USD 30 million in Series B funding, which the company designated for expanding its advanced healthcare IoT cybersecurity solutions and strengthening its presence in North America, demonstrating strong investor confidence in the market's growth potential.

### Regional Market Leadership

North America is positioned to lead the medical IoT security market, driven by widespread IoT technology adoption throughout the region and continuous advancements in the healthcare sector. Government commitment to cybersecurity reinforces this leadership position. The President's Budget for FY 2023 allocated approximately USD 10.9 billion in budget authority for civilian cybersecurity-related activities across civilian federal IT spending. Within this allocation, the Department of Health and Human Services received approximately 11.9 percent, amounting to around USD 7,824 million, reflecting substantial governmental recognition of healthcare cybersecurity importance.

### Leading Security Solutions

The market features comprehensive security solutions designed to address the unique challenges of protecting medical IoT devices. Palo Alto Medical IoT Security offers a

comprehensive Zero Trust security solution specifically designed for securing medical devices in healthcare organizations. This solution protects connected medical devices including diagnostic and monitoring systems, ambulance equipment, and surgical robots from cyber threats. The platform utilizes machine learning to automate device discovery, contextual segmentation, and policy enforcement, simplifying zero-trust approach implementation for healthcare organizations. Integration with Palo Alto Networks' cloud-delivered security services provides enhanced threat protection capabilities.

Cynerio delivers cybersecurity solutions tailored to healthcare environment requirements. Their technology provides automated discovery of all connected devices on healthcare networks, regardless of operating system, location, or manufacturer. The platform offers complete visibility and inventory of connected devices while reducing false positives, enabling healthcare organizations to address security issues efficiently. Cynerio's solutions include detection and response capabilities for various cyber threats, including ransomware, often responding within two hours. The platform also provides compliance reporting functionality to meet regulatory requirements related to IoT and Internet of Medical Things devices.

## Market Challenges

Despite strong growth prospects, the medical IoT security market faces challenges stemming from the unpredictability and evolving nature of cyberattacks. Threat actors continuously develop new attack methodologies, requiring security solutions to adapt rapidly and maintain effectiveness against emerging threats. This dynamic threat landscape necessitates ongoing innovation and investment in advanced security technologies to protect healthcare infrastructure and patient data effectively.

## Key Benefits of this Report:

**Insightful Analysis:** Gain detailed market insights covering major as well as emerging geographical regions, focusing on customer segments, government policies and socio-economic factors, consumer preferences, industry verticals, and other sub-segments.

**Competitive Landscape:** Understand the strategic maneuvers employed by key players globally to understand possible market penetration with the correct strategy.

**Market Drivers & Future Trends:** Explore the dynamic factors and pivotal market

trends and how they will shape future market developments.

**Actionable Recommendations:** Utilize the insights to exercise strategic decisions to uncover new business streams and revenues in a dynamic environment.

**Caters to a Wide Audience:** Beneficial and cost-effective for startups, research institutions, consultants, SMEs, and large enterprises.

What do businesses use our reports for?

Industry and Market Insights, Opportunity Assessment, Product Demand Forecasting, Market Entry Strategy, Geographical Expansion, Capital Investment Decisions, Regulatory Framework & Implications, New Product Development, Competitive Intelligence

Report Coverage:

Historical data from 2021 to 2025 & forecast data from 2026 to 2031

Growth Opportunities, Challenges, Supply Chain Outlook, Regulatory Framework, and Trend Analysis

Competitive Positioning, Strategies, and Market Share Analysis

Revenue Growth and Forecast Assessment of segments and regions including countries

Company Profiling (Strategies, Products, Financial Information, and Key Developments among others.

Medical IoT Security Market Segmentation

By Device

Infusion & Insulin Pump

## Contents

### **1. EXECUTIVE SUMMARY**

### **2. MARKET SNAPSHOT**

- 2.1. Market Overview
- 2.2. Market Definition
- 2.3. Scope of the Study
- 2.4. Market Segmentation

### **3. BUSINESS LANDSCAPE**

- 3.1. Market Drivers
- 3.2. Market Restraints
- 3.3. Market Opportunities
- 3.4. Porter's Five Forces Analysis
- 3.5. Industry Value Chain Analysis
- 3.6. Policies and Regulations
- 3.7. Strategic Recommendations

### **4. TECHNOLOGICAL OUTLOOK**

### **5. MEDICAL IOT SECURITY MARKET BY DEVICE**

- 5.1. Introduction
- 5.2. Infusion & Insulin Pump
- 5.3. Smart Pen
- 5.4. Wireless Smart Monitors
- 5.5. Others

### **6. MEDICAL IOT SECURITY MARKET BY APPLICATION**

- 6.1. Introduction
- 6.2. Remote Patient Monitoring
- 6.3. Medical Device Usage
- 6.4. Others

### **7. MEDICAL IOT SECURITY MARKET BY END-USER**

- 7.1. Introduction
- 7.2. Hospitals
- 7.3. Clinics

## **8. MEDICAL IOT SECURITY MARKET BY GEOGRAPHY**

- 8.1. Introduction
- 8.2. North America
  - 8.2.1. USA
  - 8.2.2. Canada
  - 8.2.3. Mexico
- 8.3. South America
  - 8.3.1. Brazil
  - 8.3.2. Argentina
  - 8.3.3. Others
- 8.4. Europe
  - 8.4.1. United Kingdom
  - 8.4.2. Germany
  - 8.4.3. France
  - 8.4.4. Spain
  - 8.4.5. Others
- 8.5. Middle East and Africa
  - 8.5.1. Saudi Arabia
  - 8.5.2. UAE
  - 8.5.3. Others
- 8.6. Asia Pacific
  - 8.6.1. China
  - 8.6.2. Japan
  - 8.6.3. India
  - 8.6.4. South Korea
  - 8.6.5. Australia
  - 8.6.6. Others

## **9. COMPETITIVE ENVIRONMENT AND ANALYSIS**

- 9.1. Major Players and Strategy Analysis
- 9.2. Market Share Analysis
- 9.3. Mergers, Acquisitions, Agreements, and Collaborations

#### 9.4. Competitive Dashboard

### **10. COMPANY PROFILES**

- 10.1. Palo Alto Networks
- 10.2. Cynerio
- 10.3. Futurex LP
- 10.4. Forescout Technologies, Inc
- 10.5. Cylera
- 10.6. Claroty
- 10.7. Ordr
- 10.8. Asimily
- 10.9. Axonious
- 10.10. Phosphorus Cybersecurity

### **11. APPENDIX**

- 11.1. Currency
- 11.2. Assumptions
- 11.3. Base and Forecast Years Timeline
- 11.4. Key Benefits for the Stakeholders
- 11.5. Research Methodology
- 11.6. Abbreviations
