Abstracts

Middle East and Africa probiotics market is projected to grow at a CAGR of 5.45% during the 2019-2025 period. Changing food pattern consumption coupled with the increasing number of people from these diseases is leading to the growing adoption of probiotics in daily diet. The Middle East and Africa probiotic market is expected to grow at a rapid pace during the forecast period due to growing awareness regarding fitness and good health, especially among the younger population base. The development of advanced and superior probiotic strains for specific purposes is further fueling the market growth. The increasing consumption of meat and other livestock products is boosting the growth of the market as the probiotics in the animal husbandry industry ensure the proper health of animals to eliminate the constant threat of disease outbreaks.
