Abstracts

The Netherlands automotive safety airbag market is expected to grow at a CAGR of 3.80%. The demand for safety airbags in Netherlands is estimated to boost during the forecast period mainly on the account of a significant increase in road traffic deaths. Furthermore, the strong automotive sector of the country and the penetration of electric vehicles is also one of the major driving factors for the market to grow during the given time frame. Moreover, the Netherlands is considered as one of the most suitable country in the European region for autonomous driving, thus the growing penetration of autonomous vehicles will also positively impact the growth of the market during the next five years.
