### **Abstracts**

The network management system market is estimated to grow at a CAGR of 8.64% to reach a market size of US\$10.919 billion by 2024. The growth of this market is majorly attributed to rapid growth of network infrastructure globally. Huge investments by major players in the communication and technology industry into development of network infrastructure, is a major factor shaping the growth of this market. Increasing need among the end user enterprises to enhance their Quality of Experience (QOE) and Quality of Service (QOS) is fueling the adoption of these solutions which offer better visibility into the network and better control over it. This is boosting the growth of this market. The market is anticipated to grow at a good rate during the forecast period on account of growing deployment of 5G across regions.
