Abstracts

Nutraceutical ingredients market is estimated to grow at a CAGR of 7.49% to reach a market size of US\$50.723 billion in 2024 from US\$32.894 billion in 2018. A nutraceutical is an alternative to pharmaceuticals that claims to have physiological benefits. It is any substance considered as a food or part of food which provides the nutritional value to the diet. The Nutraceutical ingredients are a major source of enzymes, probiotics, carotenoids, amino acids, proteins, various vitamins and minerals, fibers, etc. The rise of the aging population increased incidences of chronic diseases, and the increase of health consciousness among consumers has led to a growing demand for nutraceutical ingredients. Furthermore, the use of nutraceutical ingredients in the pharmaceutical drugs, for its anti-aging properties; and the support by the government organizations for its use due to the inadequate levels of vitamins and minerals in the human body has also supported the growth of the market.

However, the high prices of the nutraceutical ingredient and different regulatory frameworks for different countries can act as a constraint in the growth of the market. The growth in the market can be fuelled by creating innovative and new products, mergers & acquisitions, joint ventures, and increasing the product portfolio.
