Abstracts

Global prenatal testing market is projected to grow at a CAGR of 9.59% to reach US\$6.191 billion by 2024, from US\$3.574 billion in 2018. Prenatal tests are procedures that make sure that the mother and the fetus are healthy. Common prenatal testing includes ultrasound tests, amniocentesis, and chorionic villi sampling (CVS) tests. Growing healthcare expenditure, rising stress conditions due to the adoption of unhealthy living conditions are driving the growth of the global prenatal testing market in the forecast period. Currently, the focus is on non-invasive prenatal testing.

The market is fueled by the surge in the number of late pregnancies coupled with the rising demand of the non-invasive procedures for early diagnosis of chromosomal disorders to help in the proper management of disease during the initial period of the gestation. An increase in healthcare investments and growing awareness regarding prenatal testing will provide ample opportunities for growth for the market players during the given forecast period.

The Global Prenatal Testing Market – Forecasts from 2019 to 2024” is an exhaustive study that aims to present the key market trends through various chapters focusing on different aspects of the market. The study provides a detailed market overview through the market dynamics sections which detail key market, drivers, restraints, and opportunities in the current market. The report analyzes key opportunity regional markets, and the current technology penetration through lifecycle analysis. The report also analyzes the market through comprehensive market segmentation by techniques, indication, end-users, and geography.

Based on techniques, the market has been segmented as Non-invasive and Invasive. On the basis of indication, global prenatal testing market is segmented as genetic diseases and infectious diseases. Based on End-Users, the market has been segmented as Hospitals and Clinics and Diagnostic Labs.

Regional analysis has been provided with detailed analysis and forecast for the period 2019 to 2024. The global market has been broken down into North America, South America, Europe, Middle East and Africa, and Asia Pacific regions. The report also analyzes major countries across these regions with thorough analysis and forecast along with prevailing market trends and opportunities which each of these countries present for the manufacturers.

Major players in the prenatal testing market have been covered along with their relative competitive position and strategies.
