Abstracts

The privileged identity management market was valued at US\$1,559.091 million in 2018 and is expected to grow at a CAGR of 23.44% over the forecast period to reach a total market size of US\$5,515.780 million by 2024. The growth of this market is majorly attributed to the rapidly growing digitization of business processes and increasing risks to data security across enterprises. These factors have been pushing IT decision-makers across all major geographies to ramp up their investments into advanced technologies to enhance the security of the overall IT environment. Privileged Identity Management (PIM) facilitates continuous monitoring and protection of superuser accounts in order to ensure that greater access abilities of such accounts are not misused and data security is not compromised. Stringent regulations in many regions regarding data security are further pushing the enterprises towards adopting PIM solutions, thus boosting the growth of the market.
