## Abstracts

The pulp & paper chemicals market is forecasted to rise at a 2.77% CAGR, reaching USD 27.201 billion in 2031 from USD 23.082 billion in 2025.

The pulp & paper chemicals market comprises the specialized chemical additives and functional agents used throughout the manufacturing process of paper, paperboard, and related products. This market is integral to the paper industry, providing chemicals for pulping, bleaching, sizing, coating, and retention, which collectively determine the final paper's strength, brightness, printability, water resistance, and other key performance attributes. These chemicals enable the transformation of raw wood fibers and recycled pulp into a vast array of functional and consumer-grade paper products, making it a critical, value-adding segment within the broader forest products supply chain.

Market expansion is fundamentally driven by the enduring global demand for paper-based packaging, which represents the largest and most resilient end-use segment. The growth of e-commerce, coupled with a powerful global shift toward sustainable, fiber-based packaging as an alternative to plastics, is generating sustained demand for containerboard and specialty packaging grades. This trend directly increases the consumption of chemicals used in strength enhancement, sizing (for water resistance), and coating for printability. The performance requirements of modern packaging necessitate sophisticated chemical solutions.

Concurrently, a dominant and transformative driver is the intensifying focus on environmental sustainability and circularity. This manifests in two key ways: first, the rising use of recycled fiber, which requires specific bleaching and deinking chemicals to remove contaminants and restore brightness; and second, the strong demand for biodegradable and eco-friendly processing chemicals. Regulatory pressure and

consumer preference are pushing mills to replace traditional, fossil-based chemicals with bio-based alternatives (e.g., starches, soy-based binders) and to adopt closed-loop water systems that demand compatible, low-impact chemistries.

Within product segments, functional chemicals (coating pigments, binders, sizing agents) and bleaching chemicals are experiencing significant demand. Functional chemicals are essential for producing high-value coated papers used in labeling, high-end packaging, and printing, where surface properties are critical. Bleaching chemicals are crucial for both virgin pulp brightness and, increasingly, for processing the growing volumes of recovered paper, supporting the recycled paper market's expansion.

Geographically, the Asia-Pacific region is established as the dominant production and consumption market. This leadership is underpinned by the region's massive and integrated paper and packaging manufacturing base, particularly in China, which is the world's largest producer and consumer of paper products. The region's rapid e-commerce growth and manufacturing output create concentrated demand for both commodity and specialty paper grades, driving corresponding chemical consumption.

The competitive and operational landscape is characterized by a mix of large, diversified chemical corporations and specialized niche players. Competition centers on application-specific expertise, the ability to provide integrated chemical systems that optimize mill performance, and innovation in sustainable chemistries. Success hinges on deep technical service capabilities, collaborative R&D with paper mills to solve specific process challenges (e.g., reducing energy, increasing yield), and a global supply chain capable of serving large, multinational paper companies.

Despite its essential role, the market faces significant structural and external headwinds. A primary long-term constraint is the secular decline in demand for graphic and communication papers (newsprint, writing paper) due to digital substitution. This erosion of a once-core market segment requires continuous portfolio rebalancing toward packaging and tissue chemicals. Furthermore, the paper industry is a major consumer of water and energy, facing increasing regulatory and social pressure. Chemical suppliers are thus compelled to develop solutions that help mills reduce their freshwater footprint and energy consumption, adding a layer of complexity to innovation.

In conclusion, the pulp & paper chemicals market is a mature industry undergoing a strategic pivot, aligning its growth with the robust packaging segment and the sustainability imperative. Its trajectory is now more closely tied to packaging trends and recycling rates than to overall paper tonnage. For industry experts, strategic focus must

center on accelerating the development of high-performance, bio-based and circular chemical solutions, creating chemistries that enable the use of alternative, non-wood fibers, and providing digital tools for precise chemical dosing and process optimization to maximize mill efficiency. The future lies in chemistry that not only improves paper performance but also actively reduces the environmental footprint of its production, supporting the paper industry's transition to a truly circular and low-impact model. Success will be defined by a supplier's ability to deliver chemical intelligence that enhances both the economics and the environmental profile of modern papermaking.

#### Key Benefits of this Report:

**Insightful Analysis:** Gain detailed market insights covering major as well as emerging geographical regions, focusing on customer segments, government policies and socio-economic factors, consumer preferences, industry verticals, and other sub-segments.

**Competitive Landscape:** Understand the strategic maneuvers employed by key players globally to understand possible market penetration with the correct strategy.

**Market Drivers & Future Trends:** Explore the dynamic factors and pivotal market trends and how they will shape future market developments.

**Actionable Recommendations:** Utilize the insights to exercise strategic decisions to uncover new business streams and revenues in a dynamic environment.

**Caters to a Wide Audience:** Beneficial and cost-effective for startups, research institutions, consultants, SMEs, and large enterprises.

What do businesses use our reports for?

Industry and Market Insights, Opportunity Assessment, Product Demand Forecasting, Market Entry Strategy, Geographical Expansion, Capital Investment Decisions, Regulatory Framework & Implications, New Product Development, Competitive Intelligence

Report Coverage:

Historical data from 2021 to 2025 & forecast data from 2026 to 2031

Growth Opportunities, Challenges, Supply Chain Outlook, Regulatory Framework, and Trend Analysis

Competitive Positioning, Strategies, and Market Share Analysis

Revenue Growth and Forecast Assessment of segments and regions including countries

Company Profiling (Strategies, Products, Financial Information, and Key Developments among others.

## Pulp & Paper Chemicals Market Segmentation

By Type

Pulping Chemicals

Cooking Chemicals

Bleaching Chemicals

Functional & Processing Chemicals

Biocides

Defoamers

Sizing & Strengthen Chemicals

Coating Chemicals

Others

By Chemical Type

Sodium Hydroxide

Calcium Carbonate

Hydrogen Peroxide

Chlorine Dioxide

Others

By Application

Printing & Writing Paper

Tissue Paper

Packaging Paper

Industrial Paper

Others

By Geography

North America

USA

Canada

Mexico

South America

Brazil

Argentina

Others

Europe

Germany

France

United Kingdom

Spain

Others

Middle East and Africa

Saudi Arabia

UAE

Others

Asia Pacific

China

India

Japan

South Korea

Indonesia

Thailand

Others

## Contents

### **1. EXECUTIVE SUMMARY**

### **2. MARKET SNAPSHOT**

- 2.1. Market Overview
- 2.2. Market Definition
- 2.3. Scope of the Study
- 2.4. Market Segmentation

### **3. BUSINESS LANDSCAPE**

- 3.1. Market Drivers
- 3.2. Market Restraints
- 3.3. Market Opportunities
- 3.4. Porter's Five Forces Analysis
- 3.5. Industry Value Chain Analysis
- 3.6. Policies and Regulations
- 3.7. Strategic Recommendations

### **4. TECHNOLOGICAL OUTLOOK**

### **5. PULP & PAPER CHEMICALS MARKET BY TYPE**

- 5.1. Introduction
- 5.2. Pulping Chemicals
  - 5.2.1. Cooking Chemicals
  - 5.2.2. Bleaching Chemicals
- 5.3. Functional & Processing Chemicals
  - 5.3.1. Biocides
  - 5.3.2. Defoamers
  - 5.3.3. Sizing & Strengthen Chemicals
  - 5.3.4. Coating Chemicals
  - 5.3.5. Others

### **6. PULP & PAPER CHEMICALS MARKET BY CHEMICAL TYPE**

- 6.1. Introduction

- 6.2. Sodium Hydroxide
- 6.3. Calcium Carbonate
- 6.4. Hydrogen Peroxide
- 6.5. Chlorine Dioxide
- 6.6. Others

## **7. PULP & PAPER CHEMICALS MARKET BY APPLICATION**

- 7.1. Introduction
- 7.2. Printing & Writing Paper
- 7.3. Tissue Paper
- 7.4. Packaging Paper
- 7.5. Industrial Paper
- 7.6. Others

## **8. PULP & PAPER CHEMICALS MARKET BY GEOGRAPHY**

- 8.1. Introduction
- 8.2. North America
  - 8.2.1. USA
  - 8.2.2. Canada
  - 8.2.3. Mexico
- 8.3. South America
  - 8.3.1. Brazil
  - 8.3.2. Argentina
  - 8.3.3. Others
- 8.4. Europe
  - 8.4.1. Germany
  - 8.4.2. France
  - 8.4.3. United Kingdom
  - 8.4.4. Spain
  - 8.4.5. Others
- 8.5. Middle East and Africa
  - 8.5.1. Saudi Arabia
  - 8.5.2. UAE
  - 8.5.3. Others
- 8.6. Asia Pacific
  - 8.6.1. China
  - 8.6.2. India

- 8.6.3. Japan
- 8.6.4. South Korea
- 8.6.5. Indonesia
- 8.6.6. Thailand
- 8.6.7. Others

## **9. COMPETITIVE ENVIRONMENT AND ANALYSIS**

- 9.1. Major Players and Strategy Analysis
- 9.2. Market Share Analysis
- 9.3. Mergers, Acquisitions, Agreements, and Collaborations
- 9.4. Competitive Dashboard

## **10. COMPANY PROFILES**

- 10.1. Solenis
- 10.2. Nouryon
- 10.3. Ashland Inc
- 10.4. Buckman
- 10.5. Kemira Oyj
- 10.6. SNF Floerger
- 10.7. Dow Inc.
- 10.8. Evonik Industries AG
- 10.9. Ecolab
- 10.10. Shell Global
- 10.11. Clariant AG

## **11. APPENDIX**

- 11.1. Currency
- 11.2. Assumptions
- 11.3. Base and Forecast Years Timeline
- 11.4. Key Benefits for the Stakeholders
- 11.5. Research Methodology
- 11.6. Abbreviations
