## Abstracts

Refining catalysts market is projected to grow at a CAGR of 1.01% during the forecast period, reaching a total market size of US\$3.274 billion in 2024 from US\$3.083 billion in 2018. Stringent emission control regulations and an increase in the usage of petroleum derivatives are driving the market of refining catalysts. Rising investments in refineries and the accelerating demand for transportation fuel is boosting the growth of the market. Increase use of nano-catalysts in various refining procedures is expected to uplift the growth of the market. Geographically, Asia Pacific region is expected to have a significant market share owing to the increasing refinery in the region. Moreover, increasing demand for transport fuel is also boosting the market growth in the region. North America region is also expected to have a significant market share on account of the presence of large refineries in the region. Increasing concern towards environmental effects of crude oil and search for alternatives may restrain the market growth. Rising popularity of renewable sources of energy such as natural gas, solar energy, wind energy, and others can hamper the growth of the market.
