Abstracts

Global rehabilitation equipment treatment market is projected to grow at a CAGR of 5.64% to reach US\$5.003 billion by 2024, from US\$3.6 billion in 2018. Rehabilitation is referred to treatment or treatments which are designed for the facilitation of the recovery process from an injury or an illness. The purpose of rehabilitation is for the restoration of the patient's physical, sensory and mental capabilities which were lost during an injury or an illness. This includes assistance by qualified therapists only and compensates for deficits that cannot be reversed through medical care. Growing number of degenerative diseases and rising trauma cases are driving the growth of the global rehabilitation equipment market in the forecast period. Also, the growing demand for rehabilitation equipment by the emerging economies is further propelling market growth. In the end, communication between the manufacturers and customers are expected to promote the growth of the global rehabilitation equipment market in the coming years and beyond.
