## Abstracts

Remote Access Software market is projected to grow at a CAGR of 16.52% during the forecast period to reach US\$1,433 million by 2022. Growing adoption of BYOD (Bring Your Own Device) policy in various enterprises coupled with increasing number of smartphone and tablet users is the major driver of Remote Access Software market. Rising number of employees across the globe access their office desktop files on their own devices in order to save time with quick access to required information. Technical advancement and growing cellular network capability are further boosting the demand for remote access software globally. Growing security threats regarding data isolation and loss of PC or laptop is projected to bolster the growth of remote access software market for remote monitoring. Furthermore, increasing number of educational institutions providing distance learning courses will provide a great opportunity for the expansion of global remote access software market for presentations, on-line education, and webinars. Geographically, APAC region is anticipated to witness the fastest regional market growth owing to rising IT infrastructure, increasing sales of smartphones, laptops, and tablets, and emerging trend of managing and accessing bank accounts via smartphones in the region.
