Abstracts

Solar PV Glass market is projected to grow at a CAGR of 15.63% to reach US\$11,717.997 million by 2023, from US\$4,903.240 million in 2017. Growing use of solar panels across different sectors coupled with reducing prices is augmenting the demand for solar PV glass worldwide. Rising awareness regarding clean energy usage is further fueling the demand for solar PV glass for residential applications. Rising investments by governments and favorable initiatives and policies to encourage the use of solar energy will also contribute to the growth of solar PV glass market during the forecast period. Geographically, North America holds a significant market share on account of growing focus on the use of renewable energy sources while APAC will witness a significant CAGR during the forecast period owing to rising solar generation capacity in the region.

This research study examines the current market trends related to the demand, supply, and sales, in addition to the recent developments. Major drivers, restraints, and opportunities have been covered to provide an exhaustive picture of the market. The analysis presents in-depth information regarding the development, trends, and industry policies and regulations implemented in each of the geographical regions. Further, the overall regulatory framework of the market has been exhaustively covered to offer stakeholders a better understanding of the key factors affecting the overall market environment.

Identification of key industry players in the industry and their revenue contribution to the overall business or relevant segment aligned to the study have been covered as a part of competitive intelligence done through extensive secondary research. Various studies and data published by industry associations, analyst reports, investor presentations, press releases and journals among others have been taken into consideration while conducting the secondary research. Both bottom-up and top down approaches have been utilized to determine the market size of the overall market and key segments. The

values obtained are correlated with the primary inputs of the key stakeholders in the Solar PV Glass value chain. The last step involves complete market engineering which includes analyzing the data from different sources and existing proprietary datasets while using various data triangulation methods for market breakdown and forecasting.

Market intelligence is presented in the form of analysis, charts, and graphics to help the clients in gaining faster and efficient understanding of the Solar PV Glass market.

Major industry players profiled as part of the report are Saint Gobain, Onyx Solar Group LLC, Green Rhino Energy Ltd, and Nippon Sheet Glass Co., Ltd. among others.
