Abstracts

The South America advanced ceramics market was valued at US\$7.462 billion in 2017 and is projected to expand at a CAGR of 6.24% over the forecast period to reach US\$10.731 billion by 2023. The recent structural reforms which led to a drop in the interest rates and controlled the inflation has paved the way for gradual recovery of the economies which is increasing the investment opportunities in the region. As a result, the performance of various industries such as automotive, manufacturing, and electronic among others in which the advanced ceramic is utilized is expected to witness stable growth during the forecast period which is anticipated to drive the South America Advanced Ceramics Market.

This research study examines the current market trends related to the demand, supply, and sales, in addition to the recent developments. Major drivers, restraints, and opportunities have been covered to provide an exhaustive picture of the market. The analysis presents in-depth information regarding the development, trends, and industry policies and regulations implemented in key countries. Further, the overall regulatory framework of the market has been exhaustively covered to offer stakeholders a better understanding of the key factors affecting the overall market environment.

Identification of key industry players in the industry and their revenue contribution to the overall business or relevant segment aligned to the study have been covered as a part of competitive intelligence done through extensive secondary research. Various studies and data published by industry associations, analyst reports, investor presentations, press releases and journals among others have been taken into consideration while conducting the secondary research. Both bottom-up and top down approaches have been utilized to determine the market size of the overall market and key segments. The values obtained are correlated with the primary inputs of the key stakeholders in the

advanced ceramic value chain. Last step involves complete market engineering which includes analyzing the data from different sources and existing proprietary datasets while using various data triangulation methods for market breakdown and forecasting.

Market intelligence is presented in the form of analysis, charts, and graphics to help the clients in gaining faster and efficient understanding of the South America advanced ceramic market.

Major industry players profiled as part of the report are Morgan Advanced Materials, Kyocera Corporation., and CeramTec GmbH among others.

Segmentation

The South America advanced ceramics market has been analyzed through following segments:

By Material

Alumina

Zirconate

Titanate

Ferrite

Others

By Type

Monolithic Ceramic

Composite Ceramic

Ceramic Coating

By End User

Electronic

Manufacturing

Automotive

Healthcare

Others

By Countries

Brazil

Argentina

Chile

Columbia

Others
