Abstracts

The South America Farm Equipment Market is expected to grow at 3.04% CAGR. Farm equipment help in reducing the dependency on labor, improving crop quality, and reducing the time for agricultural work. The increasing automation in the field of agriculture and farming along with the support from the governments in the region is driving the market for farm equipment. The growing population is attributing the market growth too since it leads to an increase in the demand for food. Additionally, the demographics of the region are also supportive of market growth. For example, Brazil has a rich content of natural resources which makes it a competitive market. Furthermore, the increasing research and development for technological advancement in the farm equipment are also augmenting the market growth to continue in the forecasted period. However, the high cost of equipment and the growing market for used/second-hand equipment is a restraint in the growth of the market.
