Abstracts

South America Smart Glass market is estimated to attain a CAGR of 13.45%, reaching US\$ 0.238 billion in 2022, increasing from US\$0.112 billion 2016. Smart Glasses are special types of glasses which change themselves from transparent to opaque upon the creation of any disturbance. Increasing awareness, increasing real-estate activities and rapid urbanization are some of the factors driving the market growth. Brazil and Argentina being the leading regions in construction and automotive industries in this region, are also estimated to witness a high growth rate in the smart glass market during the forecast period.

This research study examines the South America smart glass market by technology, application, and country. Major drivers, restraints, and opportunities have been explained to provide an exhaustive picture of the market. Furthermore, the current market trends related to the demand, supply, and sales, in addition to the recent developments, have been provided in this report. The report also analyses key players in the South America smart glass market. The report provides comprehensive forecast up to the period 2022 for various key segments, with 2016 as the base year.

The analysis presents in-depth information regarding the development, trends, and industry policies and regulations implemented in each of the geographical segments. Moreover, the research study analyses the overall regulatory framework of South America smart glass market, offering stakeholders a better understanding of the key factors affecting the overall market environment.

The first step towards determining the South America smart glass market size involves identifying key players and the revenue contribution of the overall business or relevant segment aligned to the study in consideration through extensive secondary research.

This also includes various studies and data published by industry associations, analyst reports, investor presentations, press releases and journals among others. Both bottom-up and top-down approaches are utilized to determine the market size of the overall market and key segments. The values obtained are correlated with the primary inputs of the key stakeholders in the South America smart glass value chain, such as C-Level Executives, Directors, and Managers among others across key enterprises operating as manufacturers, suppliers, and distributors. The last phase is providing intelligence in the form of presentation, charts, graphics and other different formats helping the clients in faster and efficient understanding of the market. Under this phase complete market engineering is involved which includes analyzing the gathered data from different sources and existing proprietary datasets while using various data triangulation methods for market breakdown and forecasting.

Segments covered under the South America smart glass market report are as below:

Technology:

- Thermochromic Glass
- Suspended Particle Device (SPD) Glass
- Electrochromic Glass
- Liquid Crystal Glass
- Photochromic Glass
- Others

Applications:

- Automotive
- Power Generation
- Consumer Electronics
- Transportation
- Architecture and Construction
- Others

Country:

- Brazil
- Argentina
- Chile
- Colombia
