Abstracts

The global sulfamic acid market is projected to have a compound annual growth rate of 7.13%, growing from US\$264.263 million in 2019 to US\$427.972 million in 2026. The market of sulfamic acid is expected to drive by increasing demand in the industrial applications, and the increasing demand for the personal care and cosmetic products. The sulfamic acid is used as a chemical cleaning agent as it is a water-soluble compound in the industrial sector. In the consumers' applications, the people demand for the hygiene is increasing which is increasing the demand for household cleaning agents. Also, people's expenditure is increasing for the personal care and cosmetic products which is also boosting the growth of the sulfamic acid market. The growth of the sulfamic acid is expected to be restrained by the health-related harmful effects, and government strict rules and regulations. The usage of sulfamic acid can cause cancer, rashes, itches etc.

The market of sulfamic acid is segmented by form into liquid, crystal, powder, and others. It is expected that in the forecasted period, the growth of the liquid sulfamic acid market will be significant, as liquid form of sulfamic acid is extremely effective inhibitor, and widely used in the industrial applications such as water systems cleaning and maintenance, and so on. The segmentation of the sulfamic acid by end-users, the market is segmented into Pharmaceutical, Food & Beverages, agriculture, cosmetics, and others. The market by region is segmented into North America, South America, Europe, Middle East and Africa and Asia Pacific. Asia Pacific is expected to have the widespread growth in the forecast period. In South America, the demand for the sulfamic acid is driven by the demand for the personal care products, and that in North America, the market is expected to be driven by the demand for the cosmetic products in this region. In Europe, the increasing research and development in the sulfamic acid market in various applications is boosting the growth of the sulfamic acid. By applications, the market of sulfamic acid is segmented into electro-plating & electro-refining, sulfation & sulfamation, metal finishing, dyes & pigments, paper & pulp, plastic,

and others, where others include descaling of water, scaling of hardware, chlorination of water, fire sealing agent, and so on. Currently, the metals finishing is holding a significant market share in the sulfamic acid market and more demanding over hydrochloric acid because of its less corrosive nature, and hence, projected to have a positive growth in the forecast period. Apart from the metal finishing, the other one that is expected to grow significantly in the forecast period is dyes & pigments market, as the sulfamic acid helps to get the better and clearer pigments of different shades of colors along with consistency expanded between the dyes produced. The metal finishing market is expected to be driven by the increasing demand for the industrial equipment maintenance.

Covid-19 impact

The pandemic covid-19 has impacted all the manufacturing industries as well as the chemical industries including the sulfamic acid industry as well. Due to lockdowns, the production has impacted negatively, which lead to piling of the inventory stock and decline in the demand for the new raw material supply. Sulfamic acid is generally used as an acid cleaning agent for the metals and ceramic based goods in the manufacturing industry, which has impacted due to the shutdown of the industries. On the other side from the consumers end, pandemic has made people more concerned about the sanitization and hygiene, which has increased the demand for the detergent and toilet cleaning agents in the market, and somewhere balanced out the market for the sulfamic acid.

Recent Developments

Indonesia's Lautan Luas has developed a subsidiary, "Lautan Sulfamat Lestari" that are planning to construct a sulfamic acid plant of 7000 ton per year near Jakarta. An ISO-certified company, Vishnupriya Chemicals, India is increasing the production of the technical grade sulfamic acid to substitute the corrosion inhibitors for chlorine stabilization. To establish a plant of the sulfamic acid, the firms need to take approval from ISO and Food Drug Association. Milliken, a chemicals-based company is planning to collaborate with the chemists in order to expand in the sulfamic acid market by bringing innovations in the equipment services.

APAC to witness lucrative growth

Asia Pacific region is expected to witness a significant growth rate in the forecast period. The growth of the market in this region is expected to be driven by the

increasing sanitization concerns of water, expanding chemical industry, and increasing demand of the cosmetics by the people in Asia Pacific region. In Asia Pacific region, China and India is expected to have the significant market share of the sulfamic acid in the forecast period, as China has the several medium sized companies, and the major demand comes from this country. India has the increasing demand for the sulfamic acid in the applications of paper packaging, plastics, pharmaceuticals, and pigment.

Segmentation:

By Form

Liquid

Crystal

Powder

By Application

Electro-plating & Electro-refining

Sulfation & Sulfamation

Metal finishing

Dyes & Pigments

Others

By End-users

Pharmaceutical

Food & Beverages

Cosmetics

Others

By Geography

North America

USA

Canada

Mexico

South America

Brazil

Others

Europe

Germany

Italy

United Kingdom

France

Others

Middle East and Africa

South Africa

Others

Asia Pacific

China

Japan

India

Contents

1. INTRODUCTION

- 1.1. Market Definition
- 1.2. Market Segmentation

2. RESEARCH METHODOLOGY

- 2.1. Research Data
- 2.2. Assumptions

3. EXECUTIVE SUMMARY

- 3.1. Research Highlights

4. MARKET DYNAMICS

- 4.1. Market Drivers
- 4.2. Market Restraints
- 4.3. Porters Five Forces Analysis
 - 4.3.1. Bargaining Power of Suppliers
 - 4.3.2. Bargaining Power of Buyers
 - 4.3.3. The threat of New Entrants
 - 4.3.4. Threat of Substitutes
 - 4.3.5. Competitive Rivalry in the Industry
- 4.4. Industry Value Chain Analysis

5. GLOBAL SULFAMIC ACID MARKET ANALYSIS, BY FORM

- 5.1. Introduction
- 5.2. Liquid
- 5.3. Crystal
- 5.4. Powder

6. GLOBAL SULFAMIC ACID MARKET ANALYSIS, BY APPLICATION

- 6.1. Introduction
- 6.2. Electro-plating & Electro-refining

- 6.3. Sulfation & Sulfamation
- 6.4. Metal finishing
- 6.5. Dyes & Pigments
- 6.6. Others

7. GLOBAL SULFAMIC ACID MARKET ANALYSIS, BY END-USERS

- 7.1. Introduction
- 7.2. Pharmaceutical
- 7.3. Food & Beverages
- 7.4. Cosmetics
- 7.5. Others

8. GLOBAL SULFAMIC ACID MARKET ANALYSIS, BY GEOGRAPHY

- 8.1. Introduction
- 8.2. North America
 - 8.2.1. United States
 - 8.2.2. Canada
 - 8.2.3. Mexico
- 8.3. South America
 - 8.3.1. Brazil
 - 8.3.2. Others
- 8.4. Europe
 - 8.4.1. Germany
 - 8.4.2. Spain
 - 8.4.3. United Kingdom
 - 8.4.4. France
 - 8.4.5. Others
- 8.5. Middle East and Africa
 - 8.5.1. South Africa
 - 8.5.2. Others
- 8.6. Asia Pacific
 - 8.6.1. China
 - 8.6.2. Japan
 - 8.6.3. India
 - 8.6.4. Others

9. COMPETITIVE ENVIRONMENT AND ANALYSIS

- 9.1. Major Players and Strategy Analysis
- 9.2. Emerging Players and Market Lucrativeness
- 9.3. Mergers, Acquisitions, Agreements, and Collaborations
- 9.4. Vendor Competitiveness Matrix

10. COMPANY PROFILES

- 10.1. Raviraj Chemicals.
- 10.2. Palm Commodities
- 10.3. Yantai Sanding Chemical Co. Ltd
- 10.4. Mingda Chemicals
- 10.5. Laizhou Guangcheng Chemical Co. Ltd
- 10.6. Shree Sulphamic Chemicals
- 10.7. Acuro Organics Limited
- 10.8. Brenntag NV
- 10.9. Thermo Fisher Scientific Inc.
- 10.10. Redox Pty Ltd
- 10.11. BASF SE
