Abstracts

The surgery tables market is estimated to witness a CAGR of 4.00% to reach US\$794.516 million in 2024 from US\$628.053 million in 2018. Increasing healthcare investment around the globe is a key driver for the growth of the surgery tables market. In the recent years, there has been a gradual shift from manual operating tables to more sophisticated operating tables, these newly advanced tables increase the efficiency of the surgical process and are being increasingly preferred by the surgeons around the world. Increasing product innovations by major companies in order to gain a competitive edge is anticipated to boost the market for surgery tables in the upcoming years. However, the high cost involved with these sophisticated operating tables is considered as the restraining factor for the growth of the market.

The surgery tables market has been segmented on the basis of type, end user and geography. In the type segment, the general surgery tables are expected to hold a significant market share owing to the low cost, widespread usage, increasing demand and the growing number of healthcare institutions worldwide. Further, in the end user segment, Hospitals are anticipated to grow at a substantial rate on account of the growing number of health infrastructure and increasing number of operating rooms.

Geographically, The Asia-Pacific is projected to be a dominant region owing to the rising investment by public and private players for the development of hospitals and healthcare facilities. North America is also anticipated to be a prominent region due to the rising number of healthcare centers.
