### **Abstracts**

The swine feed market is projected to grow at a significant rate to reach a market size of US\$132.480 billion by 2024. Growing global demand for pork has led to a significant boost in swine feed production worldwide. Rising awareness regarding the nutrition of pork among consumers is compelling pig farmers to use high-quality swine feed in order to provide proper nutrition to pigs. Furthermore, increasing the swine population is considered as one of the key drivers for the growth of the market in the coming years. According to the Food and Agriculture Organization of the United Nations, swine production in the United States has increased by nearly 16.36 percent from 15362225 in 2006 reaching 17875100 in 2016. Geographically, Asia Pacific is the major market for swine feed on account of high pork production and consumption in the region.

This research study examines the current market trends related to the demand, supply, and sales, in addition to the recent developments. Major drivers, restraints, and opportunities have been covered to provide an exhaustive picture of the market. The analysis presents in-depth information regarding the development, trends, and industry policies and regulations implemented in each of the geographical regions. Further, the overall regulatory framework of the market has been exhaustively covered to offer stakeholders a better understanding of the key factors affecting the overall market environment.
