## Abstracts

Table grape market is projected to grow at a CAGR of 9.25% during the forecast period, reaching a total market size of US\$86.115 billion in 2024 from US\$50.636 billion in 2018. Table grape is one of the agricultural commodities produced worldwide and contains 20% sugar in an easily digestible form, besides being full of antioxidants and nutrients. Compared to wine grapes, table grapes have larger berries and firmer pulp, which makes it less prone to damage during shipping. The demand for table grapes is growing owing to the rising personal disposable income and change in the dietary habits of people. Rising awareness regarding the benefits of consuming various fruits is further boosting the consumption of table grapes, thus positively impacting the growth of the table grape market. Furthermore, technological advancements with respect to storage and controlling the decaying and water loss of grapes are also supporting the growth of table grapes market.
