Abstracts

The tantalum electric capacitor market is expected to reach a market size of US\$1,433.522 million in 2024, rising from US\$1,268.526 million in 2018 at a CAGR of 2.06% throughout the forecast period. The demand for tantalum electric capacitors will grow during the forecast period owing to the rising usage of electronics across different industries. In addition, increasing consumption of consumer electronics globally will further boost the demand for these capacitors. However, the problem of field crystallization and the availability of substitutes will limit the demand for these capacitors. The North American region will have a significant share of the market due to the early adoption of technology and increasing automation in different industries. The Asia Pacific market will see ample growth opportunities due to the penetration of consumer electronics and rapid industrialization.

DRIVERS

Growing focus on miniaturization of devices.

Rising in-vehicle electronics content.

The steady increase in investment in military electronics.

RESTRAINTS

Availability of substitutes

INDUSTRY UPDATE

In June 2018, AVX Corporation launched a new high-temperature wet electrolytic tantalum capacitor series for military, aerospace, industrial, and oil drilling equipment applications.

The tantalum capacitor industry has witnessed an increase in the average selling prices caused by the rising lead time.

The major players profiled in the tantalum electric capacitor market include Kemet Corporation, AVX Corporation, Vishay Intertechnology Inc., and Panasonic Corporation among others.

Segmentation

The tantalum electric capacitor market has been analyzed through the following segments:

By Technology

Wet

Solid

By Industry Vertical

Industrial

Automotive

Communication and Technology

Consumer Electronics

By Geography

Americas

USA

Canada

Brazil

Others

Europe Middle East and Africa

Germany

France

United Kingdom

Spain

Israel

Others
