## Abstracts

The global therapeutic laser market is projected to grow at a CAGR of 8.02% to reach US\$165.769 billion by 2024, from US\$104.361 billion in 2018. The demand for therapeutic laser is growing due to the rising cancer incidences worldwide, growing number of surgeries, and growing awareness regarding self-care and self-management. Also, the rising disposable income, growing healthcare expenditure and decrease in the length of hospital stays will emanate the growth of the global therapeutic laser market in the forecast period and beyond. However, the expensive laser treatments make it unaffordable for a wide patient group which may hinder the market growth in the forecast period.
