Abstracts

The Ultra Heat Treatment (UHT) milk market is projected to grow at a CAGR of 5.20% between the 2018-2024 period. It is a variety of milk which is thermally processed at or above 280° F for at least 2 seconds to pasteurize it. This process can be applied both before and after its packaging. The increasing demand for food and beverages without the use of chemicals and preservatives is going to drive the market for UHT milk around the globe during the forecast period. Furthermore, increasing dairy consumption around the world is also going to instigate the growth of UHT milk in the coming years.
